Education

Bogazici University — Istanbul, Turkey
B.Sc. in Computer Engineering; — *Sep 2021 – Jun 2026*

National University Exam (YKS): Ranked 170th in Mathematics and Science among ca. 2.6 million candidates.

Projects

Playable Lab | playablelab.org

- Built a local workspace for creating **playable ads** faster with an end-to-end pipeline across template, video, and custom-code workflows.
- Implemented asset replacement, gameplay tuning, local previews, and artifact management, enabling rapid creative variants without modifying source kits.
- Supported exports for **21 ad networks**, including build-time configuration for language, orientation, and app store URLs to produce network-ready HTML deliverables.
- Created reusable *Three.js*/PixiJS modules for object pooling, particle effects, tutorial flows, and UI elements.

Xonix3D | GitHub

- Developed a 3D, level-based version of the classic Xonix game in *Unity* using *C#*.
- Implemented grid-based movement, path drawing, area capturing, and enemy ball avoidance mechanics.
